PROFILE

Frontend developer and data engineer with a Computer Engineering background, building practical web and command-line tools that connect software, data, and everyday workflows. Project work spans configurable terminal dashboards, interactive maps, and Spotify playlist analytics.

TECHNICAL SKILLS

Programming: Python, JavaScript

Web and APIs: HTML, CSS, Flask, Django, FastAPI, REST APIs, Chart.js

Data: NumPy, Pandas, Matplotlib, Seaborn, Plotly, scikit-learn, deep learning

Systems and storage: Linux, Bash, Git, CLI, TUI, SQL, PostgreSQL, MySQL, SQLite, JSON, YAML, TOML

SELECTED PROJECTS

DripFetch

[GitHub](#)

Tools: Python, curses, YAML

Created a configurable terminal dashboard that brings system information, weather, calendar, and network graphs together in an animated interface.

Terrascope

[GitHub](#)

Tools: Python, curses, NumPy

Built an interactive terminal map combining place names, live aircraft, weather, radar, earthquakes, and day/night bands.

Playlistr

[GitHub](#)

Tools: Flask, JavaScript, Spotify API

Developed a Spotify playlist app that turns a music library into smart playlists, listening statistics, and visual insights.

EDUCATION

B.Sc. in Computer Engineering

2020 - 2025

Islamic Azad University, Gilan - Rasht, Iran

SELECTED COURSEWORK | MFT

2025: Advanced Python Programming, Security+ coursework, Data Analysis with Python, Machine Learning with Python

2023 - 2024: Programming with Python, Web Design Pack, WordPress & WooCommerce, Network+ coursework

LANGUAGES

Persian - Native | English - Professional proficiency | German - Intermediate
