Amir Shygun

BACKEND DEVELOPER | DATA / ML ENGINEER

Rasht, Iran | ryan.shygun@gmail.com | github.com/a-shygun | linkedin.com/in/amirshygun

PROFILE

Accepted to the M.Sc. Artificial Intelligence program at the University of Guilan and targeting entry-level roles in backend development or data / machine learning engineering. Six months of teaching Python and data-analysis courses, plus hands-on work building Django applications, Python tools, and data projects.

TECHNICAL SKILLS

Programming	Python, JavaScript
Backend	Django, Flask, SQLite, SQL fundamentals
Data & machine learning	NumPy, Pandas, Matplotlib, Jupyter Notebook, scikit-learn
Systems	Linux, Bash scripting
Web	HTML, CSS; React (basic)

EXPERIENCE

Python & Data Analysis Tutor

Private training institute | 6 months

- Taught beginner Python and intermediate Python through object-oriented programming, introducing core programming concepts in a clear, structured sequence.
- Delivered introductory data-analysis instruction using NumPy, Pandas, Matplotlib, and Jupyter Notebook.

SELECTED PROJECTS

YourTube — github.com/a-shygun/Yourtube

Built a local-first Django app to organize, search, and watch a personal YouTube library. Uses SQLite and keeps the library and media files on the user's own computer.

DripFetch — github.com/a-shygun/dripfetch

Created a Python terminal dashboard with animated rain and configurable system information, weather, calendar, and network widgets.

Terrascope — github.com/a-shygun/Terrascope

Built a Braille-rendered terminal map with geographic and live layers for weather, aircraft, earthquakes, and day/night.

Pawnix — github.com/a-shygun/Pawnix

Developed a curses-based Python chess client supporting local games and online play through the Lichess API.

EDUCATION

M.Sc. Artificial Intelligence — University of Guilan

B.Sc. Computer Engineering — Islamic Azad University, Gilan Branch | 2020-2025

Final score: 17.62/20
